   - Air Monitoring
   - Emissions Tracking
3. Description of new rule
2. Purpose of new rule being developed
1. Background

Presentation Outline

Improvements are needed
- Bay Area air quality has greatly improved, but additional improvements are needed.

The Bay Area needs a clear, comprehensive, and consistent approach to air quality management.
- Significant air emission reductions have been achieved in the Bay Area.
- Additional strategies can be implemented to further reduce air pollution.
- The Bay Area needs to continue to work on reducing greenhouse gas emissions.
